VOLANTÉ SYSTEMS ACHIEVES PCI CERTIFICATION

Volanté Systems is pleased to announce that it has recently achieved its PCI certification.

New government regulations require that all businesses are to be in full compliance with the PCI Security Standard. In order to achieve PCI certification, an independent audit firm needs to validate that the following activities have been undertaken: building and maintaining a secure network, protecting cardholder data, implementing strong access control measures, regularly monitor and test networks for system security, and maintain an information security policy.

Volanté Systems hired Maryland based Fortrex Technologies to conduct the certification. Fortrex is QSA, ASV and PA QSA certified and therefore compliant with the PCI Security Standards Council quality assurance program for qualified security assessors and approved scanning vendors. The new PCI program was designed to provide assessors and vendors with a set of requirements that helps ensure they provide consistent, quality validation and assessment services to merchants and service providers.

“Our goal is to offer our clients the highest levels of security at an affordable price. The investments in PCI certification are a reflection of the commitments that we have made to ensure the highest levels of quality and compliance,” commented Volanté Systems Managing Partner Joseph Brisevac.

About: Fortrex Technologies

Founded in 1997, Fortrex Technologies, Inc. is a leading provider of IT security, operational risk and compliance solutions for hundreds of customers throughout the world. Through both technology and consulting services, our customers are able to showcase conformance to IT security regulations and standards to auditors, clients, partners and investors.

Fortrex has extensive experience assisting Fortune 1000 organizations as well as small to medium-sized organizations in various industries. Fortrex helps their clients identify, assess, remediate and manage their operational risks through consulting, audit, vendor management and human capital assistance. We have served as a trusted security and risk management advisor to our clients by ensuring the confidentiality, integrity, and availability of data and systems through the provision of world-class, enterprise-wide information security services and solutions.
