

Volanté Vision

CHECKOUT IN CLEAR SIGHT

Volanté Vision delivers advanced AI-powered computer vision designed specifically for front-of-house self-checkout kiosks in foodservice.

Our solution helps foodservice management companies, healthcare cafeterias, and corporate dining environments deliver more accurate kiosk transactions and better guest experiences using Vision software and a standard webcam to identify items in real time.

How Volanté Vision Transforms Self-Checkout

Automated Item Recognition

Faster Transactions

Reduced Errors & Shrinkage

Low-Touch Convenience

Easily Deployed Across Volanté Kiosk Environments
